Oxford English Language Teaching
SHAPING learning TOGETHER

www.oup.com/elt
Every day we enrich the lives of individuals and communities through education and learning English.

Together with teachers, technology partners, and academic researchers at the University of Oxford, we work to make a broader impact on education through English language and curriculum publishing, and to create the best possible environment for learning and teaching.

Through working with technology partners we’re shaping the way learning happens, extending our range of digital resources to include innovative tools for practising language skills and vocabulary, developing our dictionaries website to include speaking and pronunciation tools, and providing online placement testing for beginner-level students at A1 level or below.

Oxford invests only in education. This year we launched the first of our Oxford Teachers’ Academy online professional development courses. Developed with the Oxford University Department for Continuing Education, these 30-hour courses make it possible for teachers to update and extend their skills at a time and pace that works for them.

As a department of the University of Oxford, we share the same mission of furthering education everywhere. In Bahrain and Vietnam, for example, we are working with local ministries to change the lives of primary children through education, providing materials to develop language and literacy in Bahrain, and a programme of professional development and learning materials to enrich the education of children in Vietnam.

I invite you to join us in shaping learning together in 2016.

I strongly believe that our cooperation and partnership with Oxford University Press is contributing significantly to the advancement of education not only in our institution but also throughout the whole Gulf region. We will surely enhance this partnership and keep looking for a brighter future as long as we are ‘shaping learning together’.

2016 marks the 30 year anniversary of Headway by John and Liz Soars. English Language Teaching has made huge progress in the past 30 years, and Headway has been there every step of the way - helping 100 million students in over 127 countries learn English.

The Hornby Educational Trust, founded by A.S. Hornby, supports the teaching of English to speakers of other languages, primarily through awarding scholarships through the British Council to English language teachers from developing and transitional countries.

Networking with other ‘Hornbies’ from around the world has enabled me to tap into a vast reservoir of experience.

We have partnered with Emerge Education, an accelerator programme for ed-tech start-ups. This partnership combines high quality content with ground-breaking technology and allows us to develop innovative products and services that improve the lives of teachers and learners globally.

We’re delighted to have won two British Council ELTons awards in 2015. One for ‘Excellence in course innovation’ with Oxford Discover, and another for ‘Innovation in learner resources’ with the Oxford Learner’s Dictionary of Academic English.

This year we are excited to launch the Oxford English Vocabulary Trainer app. We worked with Alphary, a talented language-technology start-up from Austria, to build a next-generation vocabulary-learning tool.

The app provides a personalized and engaging way of learning vocabulary, as well as giving teachers meaningful insights into student progress.

Digital is part of everyday life, let’s make it part of learning.

Using digital in your lessons can help to engage students and enrich classroom time for all. Learning is more enjoyable for students when the activities are interactive.

Learning with e-books

With our enhanced e-books on the Oxford Learner’s Bookshelf, you can teach English with some of the world’s most trusted learning materials in digital form. Your favourite coursebooks and Graded Readers offer interactive features designed specifically for language learners.

- Video plays straight from the page. Students can watch at their own pace, and complete activities at the same time.
- Slow down the audio to hear each word clearly and improve comprehension. Then speed up again for authentic listening practice.
- Get your students practising their pronunciation. Repeat the audio from the book, record your own, and compare to the original.
- Record speaking practice as an audio note and listen back, or use them as reminders.
- Personalize your e-book: draw on the page, highlight words, write text notes or record audio notes and save them anywhere on the page.
- Automatic marking lets students check their progress and learn from mistakes. They can also email a page to you.
- Project your e-book on screen to play video and audio to the whole class, or show the answers.

Oxford Learner’s Bookshelf e-books provide the core material I need in teaching a lesson. Embedded audio and video clips together with the available set of tools make my classroom management easy. Having an iPad with a digital textbook increases my productivity, since all the material I need is available anytime, anywhere.

Invertebrates

Invertebrates are all animals that do not have a backbone, or spine, at any point in their life. There are around 450,000 species of invertebrates, including insects, molluscs, annelids, echinoderms, and many others. Invertebrates are very important in the natural world. They play a key role in the food chain and in the balance of nature. For example, they help to keep populations of other species in check. Without invertebrates, many of the world’s ecosystems would suffer.

A small group of invertebrates, known as the chelicerates, has a different kind of body plan. The body of a chelicerate is divided into two parts: the cephalothorax and the abdomen. The cephalothorax is where the head and thorax are joined. The abdomen is where the rest of the body is attached. Chelicerates include spiders, scorpions, and barnacles.

The largest group of invertebrates is the arthropods. Arthropods have a hard outer shell made of chitin. This helps to protect them from predators and the elements. Arthropods are very important in the natural world. They are the most common group of invertebrates, with over 1 million known species. Some of the most familiar arthropods are insects, crustaceans, and myriapods. For example, spiders, ants, and crabs all belong to the arthropod group.

The next largest group of invertebrates is the molluscs. Molluscs are soft-bodied animals with a shell. They include snails, slugs, clams, and oysters. Molluscs are important because they help to keep populations of other species in check. They also help to break down organic matter and recycle nutrients in the soil.

The spread of English as the international lingua franca (ELF) like other aspects of globalization, calls for a reconsideration of conventional ways of thinking. This book argues that ELF needs to be understood as an essentially natural use of language in its own right and not as an economized version of native-speaker English, and demonstrates how the ‘non-conformist’ formal features of ELF are functionally motivated by the dynamics of communicative interaction.
